

March 28, 2024

County of Oxford
21 Reeve Street
PO Box 1614
Woodstock, ON N4S 7Y3

Attention: Chloe Senior, Clerk

Dear Chloe Senior:

The Upper Thames River Conservation Authority (UTRCA) hosted its Annual General Meeting on February 27, 2024. As part of this meeting the Board of Directors approved the 2024 Budget and apportionment methods. The budget includes revenue originating from municipal levy as authorized by the *Budget and Apportionment Regulation (O.Reg. 402/22)* under the *Conservation Authorities Act*. This notice and invoice are being provided to the Clerk of each member municipality and stipulate the amounts owing for 2024 along with the basis for apportionment.

Municipal contributions for 2024 have been established in accordance with the apportionment methods for Programs and Services as follows:

General Distribution:

That each participating municipality's share of the 2024 Total General Levy Distribution be calculated using "Modified Current Value Assessment" for payment of Category 1 operating and capital expenses presented in the draft budget.

Benefit-Based Apportionment:

Each participating municipality's share of the 2024 "Benefit-Based Apportionment" method be applied for use with respect for costs for Dams and Water Control Structures as identified in the 2024 Draft Budget Package.

Non-Mandatory / Cost Apportionment:

Category 3 programs and services also apply the "Modified Current Value Assessment" (MVCA) method for apportioning costs in agreements with municipalities. Please update UTRCA's Cost Apportionment Agreement Schedule B to reflect the 2024 amounts as attached.

The UTRCA's Board of Directors approved the budgets for 2024 in two parts:

- 1) A projected operating deficit of \$929,825 from \$22,933,119 in operating expenses, requiring \$7,391,639 of participating member levy, and requiring \$607,950 in cost apportioning agreements among participating members, and
- 2) A projected capital deficit of \$2,482,085 from \$5,462,894 in capital expenditures, requiring \$1,388,059 of participating member levy.

Note that municipal contributions are only a portion of these total amounts.

This letter and attachments have been provided for your reference. As well, a copy of the [2024 Approved Budget](#) is posted on the Governance page of the UTRCA's website, as required by the *Budget and Apportionment Regulation (O.Reg. 402/22)* under the *Conservation Authorities Act*.

Should you have any questions regarding the UTRCA's Approved Budget please contact the undersigned or Christine Saracino at saracinoc@thamesriver.on.ca.

Yours truly

UPPER THAMES RIVER CONSERVATION AUTHORITY

Tracy Annett
General Manager/ Secretary Treasurer

Schedule B – Apportionment of Category 3 Programs

The municipal costs associated with the Category 3 programs and services outlined in Schedule A are included and clearly identified in the UTRCA's overall annual budget. These costs will be apportioned among the participating municipalities according to the Modified Current Value Assessment (MCVA), as outlined below.

Schedule B will be updated annually and distributed to the member municipalities following the final UTRCA budget and levy apportionment approvals. The MCVA will also be updated as the province provides it to the UTRCA.

A change, if any, to the total levy outlined in Schedule B for 2023 will be applied effective January 1 each calendar year and will be the same percentage as the UTRCA's overall budget increase.

Municipality	2024 MCVA Apportionment %	Cost Apportionment \$
		Service Areas: Stewardship and Restoration Subwatershed Planning and Monitoring Community Outreach and Education
Oxford County	16.9811	\$103,236
London	64.0880	\$389,623
Lucan Biddulph	0.3507	\$2,132
Thames Centre	3.1974	\$19,439
Middlesex Centre	2.4438	\$14,857
Stratford	7.2068	\$43,814
Perth East	1.4182	\$8,622
West Perth	1.4899	\$9,058
St. Marys	1.4604	\$8,879
Perth South	1.1629	\$7,070
South Huron	0.2009	\$1,221*
TOTAL	99.8%	\$793,731

Note* - South Huron has not entered into the Cost Apportioning Agreement.

2024 UTRCA Operating Budget: Overview

The 2024 Approved Budget represents a transition to a new budgetary framework for the Upper Thames River Conservation Authority (UTRCA). New provincial legislative requirements have necessitated a reorganization of all the Authority's programs and services into three categories, with specific funding and budgeting restrictions:

- Category 1: Mandatory programs and services,
- Category 2: Programs and services that a Conservation Authority agrees to provide on behalf of a municipality,
- Category 3: Programs and services that a Conservation Authority determines are advisable to provide to further the purpose of the Conservation Authorities Act.

The legislation also added several major new Category 1 deliverables that must be completed by the end of 2024, and service delivery standards to reduce processing times for planning and development application approvals. No provincial funding has been provided to offset the cost of this additional work.

The impact of these legislative changes is significant. Growth pressures within the region and the legislative changes for planning and development applications require additional staffing capacity to meet the new service delivery standards. Updated modelling and mapping to identify hazard lands are needed to ensure new development is safe and recognizes a changing climate. Ongoing efforts are also required to maintain up-to-date hazard mapping and modelling to expedite the approvals process. Ongoing implementation, particularly with asset management, is required to maintain an Authority-wide asset management plan once it is developed.

Key Messages

- The largest impact on the UTRCA's 2024 budget is tied to \$1.5M of provincially legislated activities. No new provincial funding was provided for these activities.
- Additional budget increases are tied to rising operational and capital costs.
- The UTRCA is mitigating the impact on municipal levy by applying program revenues.
- The UTRCA member municipalities are contributing less than 60% of the funding for provincially mandated programs.
- The municipal share of the \$22.9M Approved Operating Budget is \$8M or 35%.

Impacts on the UTRCA 2024 Budget

Legislative Changes

- Reorganization of programs and services into 3 Categories with specific funding restrictions
- New mandatory deliverables due December 2024
- New service delivery standards due December 2024
- No provincial funding to offset additional work

APPROXIMATE COST: \$1.5M

UPPER THAMES RIVER
CONSERVATION AUTHORITY

Historical

- Chronically inadequate and reduced Provincial Transfer Payment
- Insufficient reserves
- Not eligible for Canada Emergency Response Benefit during COVID

Operating Environment

- Accessing qualified staff
- Compensation updates
- Aging infrastructure and increasing cost of capital projects
- Growth development pressure
- Increased land management pressures
- Development review fees frozen
- Reduced access to provincial grant programs
- Inflation

These changes are occurring during a period of elevated inflation. The UTRCA is facing continued high insurance costs, proposals submitted at double original projections, and continued high materials and labour costs under service contracts. Further, overall compensation levels rose in 2022 in an effort to keep the organization competitive in retaining existing and attracting new staff; a situation many public sector organizations are facing. Active efforts to ensure our fees are appropriate and our costs contained have always been part of our culture, particularly during Covid when the Authority was not eligible to receive federal wage subsidies.

In the UTRCA 2024 Approved Budget, base funding from our partner municipalities provides less than 60% of total mandatory (Category 1) program costs. The UTRCA will continue to offset the municipal levy for these added pressures with outside funding, as available. While these programs are all eligible for full levy funding, the UTRCA will supplement the levy with revenues from agricultural leases, interest earned on investments, and internal program chargeback recoveries to all program areas.

Total support from our municipal members for operations of \$7,999,589 is currently forecast to sustain our programs

and services. Historical budgets have kept levy contributions depressed, resulting in lower-than-desirable reserves in the areas of water and erosion control operations and land management. The UTRCA needs to adequately fund these mandatory activities to ensure the protection of people and property.

It should be noted that the campground operations in the conservation areas are sustained through park program revenues, which often generate an operating surplus. The UTRCA funds much needed capital expenditures in the parks through these surpluses.

We look forward to developing a new strategic plan in 2024 and making strides with asset management plans to ensure our continued resiliency and enable us to evolve our operations in a sustainable way.

The 2024 Approved Budget will enable the UTRCA to continue providing important programs and services in a growing watershed, support the increasing number of visitors to the conservation areas, reflect enhancements to program and service delivery objectives, and meet the requirements of the revised Conservation Authorities Act regulations.

**The UTRCA uses a benefit-based method to apportion the operating expenses and capital costs for the water control structures it operates and maintains. The local share of the costs (after reduction by available funding from senior government or other sources) is apportioned based on the benefit to the municipalities. For Fanshawe, Wildwood, and Pittock Dams, the shared benefit was determined when the funding for construction of the structures was discussed. For all other structures, the municipality where each structure is located is the sole beneficiary and, therefore, covers all the local share of operating and maintenance costs.

This approach is consistent with how these costs have been apportioned in the past and is described in the Conservation Authorities Act Regulations (OReg 402/22 Section 7(6)).

Note: Correction from February 27, 2024 version: Perth East total category 1 levy has been reduced by -\$2,000 to correct an editing error.

Budgeted for 2024 Capital	(260,000)	(173,148)	0	0	(2,048,937)	(2,482,085)
Budget Balance Estimate Year End 2024	\$450,727	\$2,978,888	\$3,793	(\$341,158)	\$1,714,331	\$4,806,581

UTRCA reserves have traditionally been highly segregated but the new Conservation Authorities Act regulations will necessitate restructuring the reserves along the lines of the three program areas.

The first line in the table above identifies the values of the reserves at the start of 2023 as if they had been restructured. Against those reserves, operating activities during 2023 are expected to result in a net addition to reserves of approximately \$722,000, which is a surplus (the 2023 Approved Budget suggested a deficit result for 2023). The 2023 results are not yet audited so they may change.

The results derived from the 2024 operating and capital budgets are then listed, by category. An operating deficit of \$929,825 is the proposed result shown in the budget package along with capital spending, net of revenues, of \$2,482,085 deficit across various categories. The capital projects are summarized on pages 6-9.

This table suggests that the significant investment in campground facilities planned for 2024 would cause the campground reserve to fall by the end of 2024, which is not entirely true. It is important to note that budgeted capital deficits only impact reserves once the expenditures have been made. The impact to reserves occurs

over many future years by way of amortization expense for earlier spending.

In the case of Category 1 water and erosion control structure reserves, the UTRCA attempts to ensure that full funding is available in the year the project occurs. The funding is deferred and matched to the future cost over the life of the capital improvement. This then creates zero net impact in future years, helping to ensure that future capital spending on critical infrastructure is not burdened by the continuing amortization expense from spending in earlier years. As often happens, capital projects take time to complete and sometimes there are unexpected costs. For this reason, 2024 identifies both surpluses in some projects for levy required to complete 2023 projects and shortfalls in other projects that will need to be levied in 2025.

The general depletion of reserves seems to be unavoidable in the short term but must be considered with respect to the organization's future funding requirements. It should be noted that the Board of Directors has approved the development of a reserve/budgetary policy in 2024 as the Authority also works to develop comprehensive asset management plans. Both efforts will assist in guiding decisions that impact reserves.

Category 1 Programs and Services: Budget

Category 1 includes the programs and services that the Province of Ontario has deemed mandatory for a Conservation Authority to deliver.

Funding

- The CA is permitted to levy their member municipalities for the full cost of delivering these mandated programs and services. The UTRCA plans to use revenues from agricultural leases, interest earned on investments, and internal program chargeback recoveries by allocating costs, to reduce the levy impact on member municipalities.
- All corporate costs may be included as Category 1 (i.e., eligible for full levy funding) but UTRCA is allocating program-specific costs to programs and services in all three categories. Essential corporate costs that are not program-specific are included as a grouping within Category 1 below (see page 22 for detail).
- Category 1 operating costs include \$1.5M for new mandatory deliverables and service delivery standards required by the end of 2024.

Category 1 Operating Budget

Category 1 Programs and Services: Overview

Environmental Planning and Regulations

The UTRCA provides planning and regulations services to protect people and property from natural hazards (e.g., flood and erosion hazards, wetlands, and the area of interference surrounding wetlands) and support safe development.

Natural hazard planning activities include:

- Planning Act delegated responsibility for natural hazards to be consistent with Provincial Policies,
- Technical information and advice to municipalities on circulated municipal land use planning applications (Official Plan and Zoning By-law Amendments, Subdivisions, Consents, Minor Variances) with respect to natural hazards.
- Input to municipal land-use planning documents (OP, Comprehensive ZB, Secondary plans) related to natural hazards, on behalf of MNRF (delegated to CAs in 1983).

Regulations activities under Section 28 of the Conservation Authorities Act include:

- Reviewing and processing permit applications, associated technical reports, site inspections, communication with applicants, agents, and consultants. Property inquiries and compliance/enforcement activities.
- Input to the review and approval processes under the Planning Act and other applicable law, (e.g., Environmental Assessment Act, Drainage Act, Aggregate Resources Act, with comments principally related to natural hazards, wetlands, watercourses and Section 28 permit requirements.

Legislation	Legislative Changes	Budget Impact
Bill 23 (More Homes Built Faster Act) and Bill 109 (More Homes for Everyone Act)	• Implement service delivery standards for the administration of planning and development reviews and permitting to expedite the approvals process,	\$240,000
S28 Conservation Authorities Act	• Consultation on and updating of hazard maps to inform planning and development applications.	\$517,000

Water Management

The UTRCA's water management program protects people and property and supports safe development by reducing risk due to flooding. Key components include:

- Providing flood forecasting and warning services for municipalities,
- Continually monitoring stream flow, reservoirs, and watershed conditions to assess flood, low flow, and climate change impacts and mitigation,
- Operating and maintaining water control structures (3 large dams, 3 flood control channels, 8 dykes/floodwalls), constructed in partnership with municipalities, to control flood flows and augment stream flow during dry periods.
- Mapping and modelling flood plains and other natural hazards,
- Developing, maintaining, and implementing Flood Contingency Plan for municipal and First Nation flood coordinators and other partners,
- Providing outreach and education programs and information on natural hazards,
- Operating and maintaining 12 erosion control structures,
- Operating and maintaining recreational water control structures for passive recreation, on behalf of municipalities.

Legislation	New Mandatory Deliverables	Budget Impact
Ontario Regulation 686/21	<ul style="list-style-type: none">• Operational and asset management plans for water and erosion control infrastructure• Ice management plan to reduce the risks associated with natural hazards	\$195,000

Land Management

The UTRCA provides public access for passive recreation on 3200 hectares of conservation lands at Fanshawe, Wildwood, and Pittock Conservation Areas, and at 11 day-use conservation areas/tracts and an arboretum (managed in partnership with local service clubs or municipalities). Management activities include risk management, encroachment monitoring, and enforcement.

More than 2000 ha of rural properties, including 1500 ha of wetland, provide long-term protection of natural heritage. Activities include forest management, signage, gates, stewardship, restoration, and ecological monitoring.

Legislation	New Mandatory Deliverables	Budget Impact
Ontario Regulation 686/21	<ul style="list-style-type: none"> Strategy to guide the management and use of CA owned/controlled properties, developed with public consultation and including periodic review and update Land inventory containing information for every parcel of land owned or controlled by the CA Land acquisition and disposition strategy 	\$274,000

Provincial Water Monitoring

The UTRCA monitors surface water at 24 Provincial Water Quality Monitoring Network (PWQMN) sites on a monthly basis (April to November). Water quality has been monitored in the Upper Thames watershed since the 1960s under the PWQMN, which is a cooperative program of the Ministry of the Environment, Conservation and Parks (MECP) and CAs. The UTRCA uses the data in the watershed report cards and to prioritize stewardship projects.

The UTRCA monitors groundwater quantity and quality in 28 wells at 22 Provincial Groundwater Monitor Network sites in cooperation with MECP. There are 23 wells sampled for water quality annually, and five wells that have been changed to biennial sampling beginning in 2023 at the discretion of MECP. Water quantity is monitored year-round at all wells.

No provincial funding is received for either of these water monitoring programs.

Drinking Water Source Protection

The UTRCA protects municipal drinking water sources through Source Protection Plans, as part of the Thames-Sydenham Source Protection Region (Upper Thames River, Lower Thames Valley, and St. Clair Region Conservation Authorities). The UTRCA is the lead Authority for the Region, providing technical and Source Protection Committee support, organizing Source Protection Authority reports and meetings, and carrying out other activities required by the Clean Water Act and regulations.

The UTRCA assists in coordinating and implementing the Source Protection Plans (SPP). Where advisable, the UTRCA reviews and comments on any proposal made under another Act that is circulated to it, to determine whether the proposal relates to a significant drinking water threat that is governed by the SPP or the proposal's potential impact on any drinking water sources protected by the SPP.

This program is currently completely funded by the province.

Watershed Management Strategy

Legislation	New Mandatory Deliverable	Budget Impact
Ontario Regulation 686/21	Develop (with consultation), implement, and report on a Watershed-based Resource Management Strategy to inform the design and delivery of programs and services that the CA is required to provide, as well as a process for periodic review including procedures to engage with interest groups and the public. The strategy development includes compiling existing resource management plans, watershed plans, strategic plans, studies, and data.	\$276,800

Essential Corporate Costs

Corporate costs support all UTRCA program areas, the Board of Directors, member municipalities, and the public, to enable the UTRCA to operate in an accountable, efficient, and effective manner.

Under the new legislation, all corporate costs are a mandatory (Category 1) service and, therefore, eligible for full levy funding.

Rather than keeping all corporate costs in Category 1, the UTRCA is allocating program-specific corporate costs to programs and services in all three Categories. These allocated costs include property insurance, IT services, costs to operate the Watershed Conservation Centre (administration building), finance and human resources unit costs, some common communications and marketing unit costs, and shared fleet and equipment costs.

The new budget format illustrates that \$1,498,088 in corporate costs is allocated to the following programs, which are not funded by municipal levy:

- \$260,380 to Category 2 programs,
- \$758,955 to Category 3 programs, and
- \$478,753 to the campground operations (other Category 3).

Essential corporate costs that are not program-specific are grouped as a Category 1 (mandatory) cost. They include board governance, administration, health and safety programs, asset management planning, shared fleet management, shared equipment, and directors and officers insurance and liability.

Category 2 Programs and Services: Budget

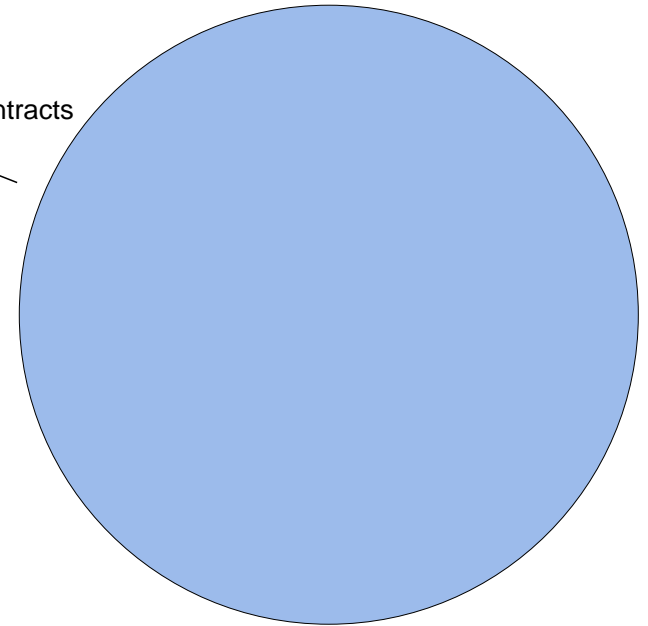

Category 2 programs and services are delivered at cost to specific municipalities under contract.

Funding

- Delivered at cost to specific municipalities under contract (cannot be funded through levy).

2024 Funding Sources: Category 2 Programs and Services

Municipal Contracts
\$1,214,647

Category 2 Operating Budget

Expenses by Type	City of London ESA/ Lands Management	City of London Water Quality Monitoring	Drinking Water Source Protection Risk Management	Total

Category 2 Programs and Services: Overview

City of London Contract Work

The UTRCA is contracted by the City of London to manage 12 Environmentally Significant Areas, manage beavers (in accordance with the City's beaver protocol), and monitor water quality and benthic invertebrates for environmental compliance.

Drinking Water Source Protection Risk Management Services

The UTRCA provides Drinking Water Source Protection Risk Management Inspector/ Official services for partner municipalities.

Category 3 Programs and Services: Budget

Category 3 programs and services are those that a Conservation Authority determines are advisable to provide to further the purpose of the Conservation Authorities Act.

Funding

- Multiple funding sources including municipal support through cost apportioning agreements (cannot be funded through levy).
- Category 3 programs and services will be funded largely through contracts and grants, most of which require some financial support from municipalities. Municipalities have been approached to agree to funding a proportion of these costs (MCVA) through agreement.
- The budget reflects anticipated funding from Environment and Climate Change Canada for phosphorus reduction programs.

South Huron*	0.2006	0.201	1,221*
Total	100	100	\$607,950

*Municipality of South Huron is not participating in Category 3 programs.

Category 3 Programs and Services: Overview

Community Partnerships and Education

Community partnerships programs are designed to increase awareness of, support for, and involvement in projects that restore and enhance watershed health and resiliency to climate change.

The programs empower communities and youth, creating value for a healthy environment through opportunities to experience and learn about conservation, and build capacity in local communities by providing hands-on learning opportunities to address local environmental concerns.

The community partnerships program facilitates relationships among watershed residents, Authority staff, and member municipalities to enable the sharing of expertise and resources. The UTRCA assists community members and “friends of groups” to identify local environmental needs, access funding, and implement on-the-ground projects within their local communities.

Curriculum-based environmental education programs work closely with watershed Boards of Education to reach over 20,000 students per year with place-based information and to support the community partnerships program. The education programs help communities and youth understand how to protect their watershed resources and avoid risks from flooding and related hazards. Education programs are hosted at Fanshawe and Wildwood Conservation Areas, local natural areas, school yards/in class, and virtually.

Ecological Monitoring

The UTRCA supports science-based decisions through environmental monitoring programs that includes collecting, analyzing, and reporting on fishes, reptiles, benthic macro-invertebrates, Species at Risk, and air photos. The information collected gives an indication of stream health, water quality, habitat change, and impacts of stressors.

Environmental information is compiled and maintained in a comprehensive monitoring database that is integrated, available to watershed partners, and commonly accessed by development proponents in watershed municipalities when undertaking technical studies or assessments associated with land development activities.

The UTRCA reports on local watershed conditions every five years, in partnership with Conservation Ontario. The Upper Thames River Watershed Report Cards provide information on surface water, groundwater, forest, and wetland conditions within 28 subwatersheds to promote an understanding of local (subwatershed) health and emerging

trends as a basis for setting environmental management priorities and inspiring local environmental action.

The UTRCA is also engaging with local First Nations communities and individuals, to support the development of a more holistic approach in watershed planning that incorporates aspects of Indigenous Traditional Knowledge and an awareness of the river's spirit, in addition to western science and management objectives.

Stewardship and Restoration

The UTRCA delivers a wide range of landowner stewardship and restoration services that improve soil health, water quality and quantity, biodiversity, and climate resiliency. A healthy Thames River will also benefit Lake St Clair and Lake Erie.

Staff provide comprehensive conservation planning, technical services, and engineering planning and design for a variety of stewardship practices. Technical plans are tailored to individual farm projects, recognizing the diverse agricultural landscape across the watershed.

Staff advise on in-stream and riparian restoration as well as wetland enhancement projects that provide flood retention, reduce peak flows, mitigate erosion hazards, and improve flow regimes. Restoration programs also include invasive species identification and control, pollinator habitat creation, and prairie seeding. The forestry program, which is one of the UTRCA's longest running programs, offers the sale of native trees and shrubs, tree planting, and woodlot management services to landowners. Windbreaks and land retirement plantings reduce erosion, increase natural cover and habitat, and build climate change resilience across the watershed. Additional, in-field technical advice and planning centred around erosion control includes land management changes or structural options.

The Clean Water Program (CWP) provides a one-window service for rural landowners to access technical assistance and financial incentives to support on the ground implementation of best management practices (BMPs) that improve and protect water quality on farmland. The CWP is funded by participating municipalities, with additional funding leveraged from government, foundations, and donations.

Demonstration sites are used to test the practicality and effectiveness of BMPs to provide environmental co-benefits without sacrificing farm productivity. The UTRCA's Thorndale Demonstration Farm is an example of efforts to share information and coordinate innovation through research, demonstration projects, workshops, and field tours, in partnership with landowners, agencies, academia, and the agriculture industry.

Property Lease Management

Management of the UTRCA cottage program, rental properties, and three golf course leases are additional Category 3 activities. The revenue from these programs has often been a means to support Category 3 programs and supplement general land management needs, as well as to provide some capital funding for facility repairs.

Other Category 3 - Campground Operations: Budget

Campground operations are also Category 3 programs and services but are not included in municipal cost apportioning agreements as their funding is self-generated.

Other Category 3 (Campground Operations) Operating Budget

Expenses by Type	Cost
Wages and Benefits	\$2,130,331
Depreciation Expenses	139,715
Property Related Expenses	851,685
Technical and Consulting Services	195,100
Computers and Communications	14,470
Insurance and Risk Management	116,900
Materials and Supplies	273,065
Fleet Related Expenses	4,500
Staff Travel, PD, PPE, Uniforms	38,475
Signage and Promotion	31,760
Corporate Allocations	478,753
Total Expenses	\$4,274,755

2024 Funding Sources: Other Category 3
Programs and Services - Campground Operations

Other Category 3 Programs and Services - Campground Operations: Overview

The three large, multi-use Conservation Areas (Fanshawe, Pittock, and Wildwood) offer camping and a wide range of other day use facilities and activities. Outdoor recreation at the three active Conservation Areas offers opportunities to educate the public and promote conservation messaging about the watershed's natural environment.

UTRCA campground operations offer nearly 1000 seasonal and 500 overnight campsites, more than 55 km of managed trails, and three large day use areas that host many major community events.

Throughout the pandemic, increased operational and management pressures were realized due to the increase in use and visitation. The interest in the campground and day-use operations has since remained high.

The state of the CAs and the infrastructure within them has remain unchanged over the past 50 years. Many of the assets are beyond their life expectancy and it should be anticipated that significant capital improvements will need to be funded over the next while. Through internal and stakeholders consultations, CA business plans and asset management plans are underway.
